AI Travel Planner

GOOGLE BUILDATHON · OPEN INNOVATION

Plan, book and go.
One app for your whole trip.

Search trains, flights, buses and stays across India in one place, pay once, get tickets on email & WhatsApp, and receive an AI-made day-by-day itinerary built from your actual bookings.

github.com/magicalnature621-coder/ai-travel-planner

MVP · 2026

THE PROBLEM

Planning one trip in India means juggling many apps

🧩 Fragmented booking

Trains on one site, flights on another, buses on a third, hotels on a fourth. Travellers compare options across tabs and re-enter the same passenger details again and again.

🗂️ Scattered confirmations

PNRs, e-tickets and hotel vouchers arrive in different emails and SMS. Finding the right ticket at the station or check-in desk is stressful.

🗺️ Planning is a separate job

After booking, travellers still search blogs and videos to plan each day. Generic plans ignore their arrival time, hotel location, budget or food preferences.

👨‍👩‍👧 Group trips are harder

Coordinating seats, rooms and details for friends or family multiplies the effort, and mistakes are costly.

OUR SOLUTION

One search → one checkout → tickets + a personal plan

01
Search once
From, to, date, days, travellers, one-way or round trip.

02
Compare & pick
Travel, stays and food in tabs. Book travel only, stay only, or both.

03
Details once
Each traveller's ID, meal preference and special requests, entered once.

04
Pay once
UPI or card for everything selected.

05
Go
PDF tickets on email & WhatsApp, a "My Trips" wallet and an AI day-by-day itinerary.

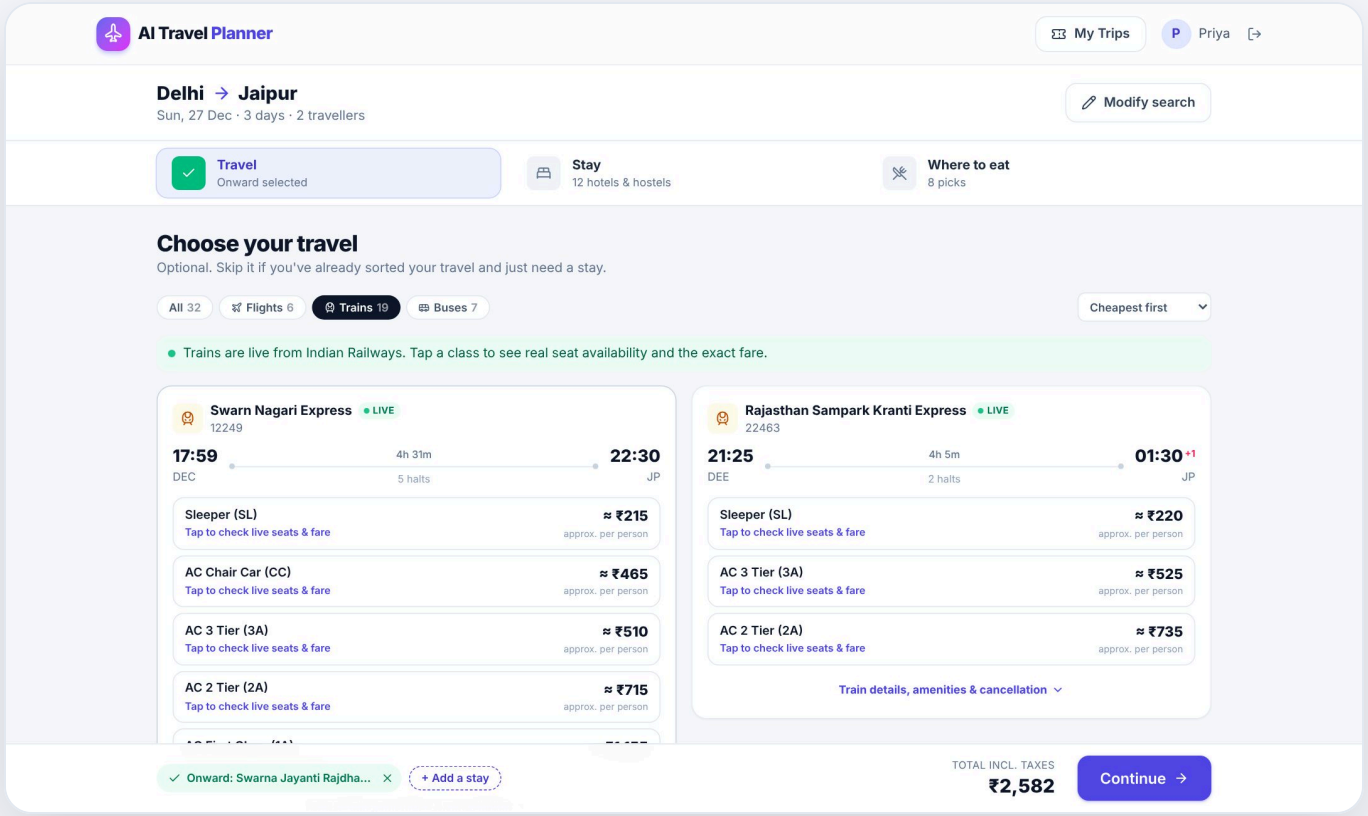

🚆 Live train data
Real Indian Railways trains, seat availability (AVL / RAC / WL) and exact fares.

🏨 Rich stay details
Photos, map, amenities, nearby sights and house rules before you select.

✨ AI itinerary
Built around arrival time, hotel area, travellers' ages, diet and special requests.

THE PRODUCT · WORKING MVP

Live trains with real seats and fares

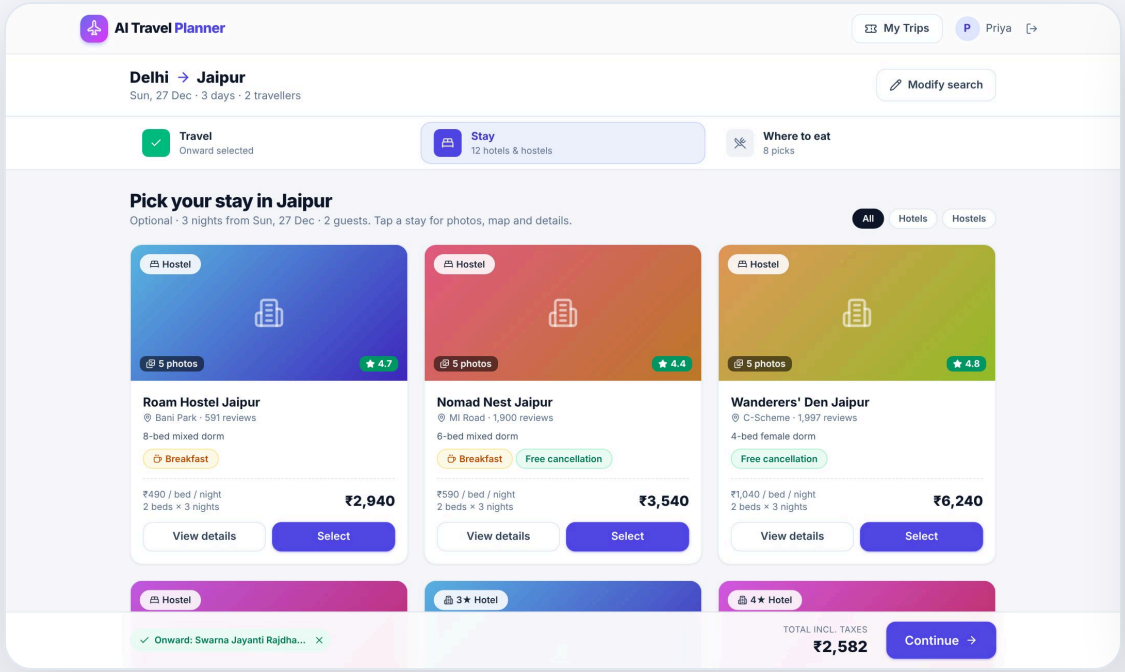

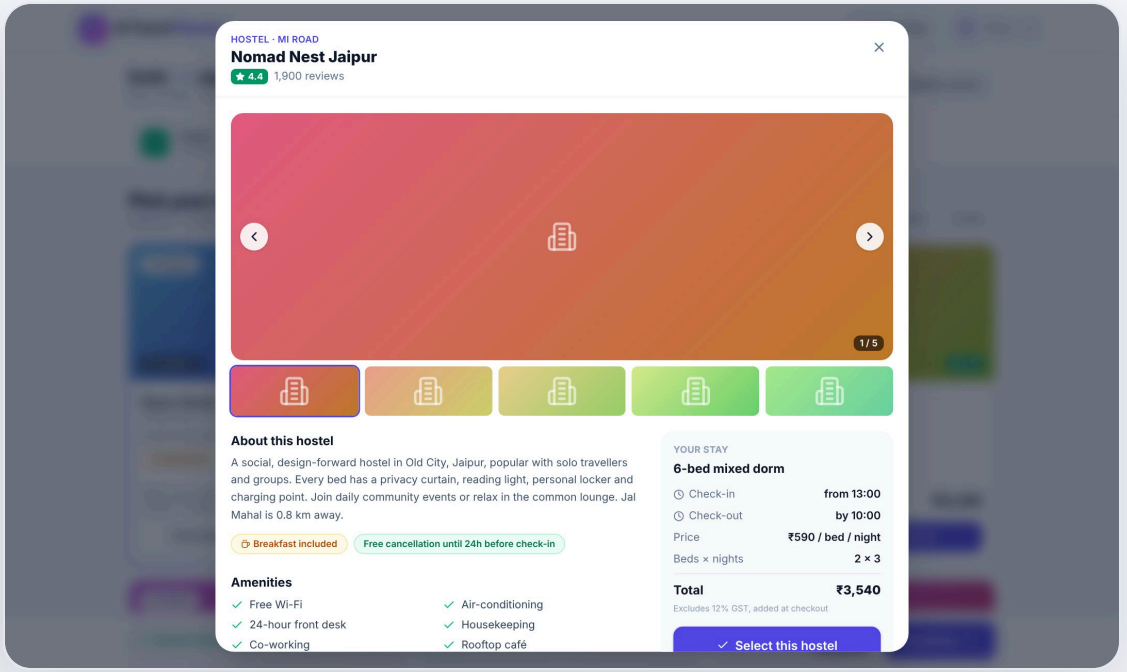

What you're seeing

- 19 real trains for Delhi → Jaipur on the chosen date, marked **LIVE**
- Tap a class to fetch real availability and the exact IRCTC fare
- Expandable details: running days, stations, pantry, cancellation rules
- Flights and buses side by side, sorted by price, speed or time
- Sticky bar shows selections and the running total incl. taxes

THE PRODUCT · WORKING MVP

Pick a stay with confidence

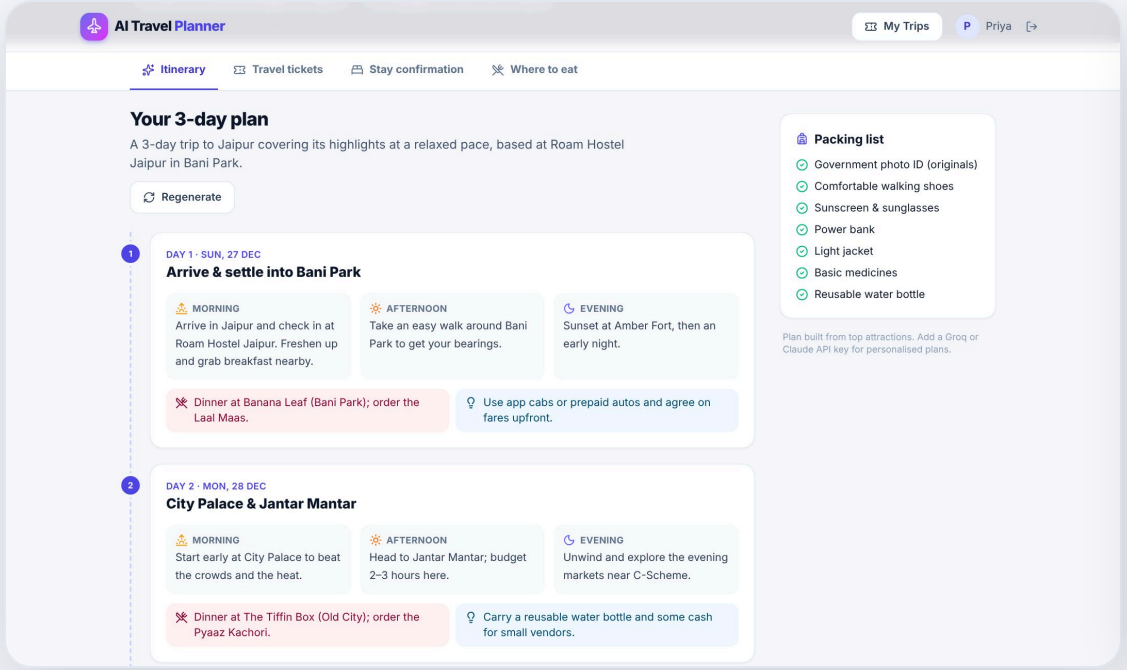

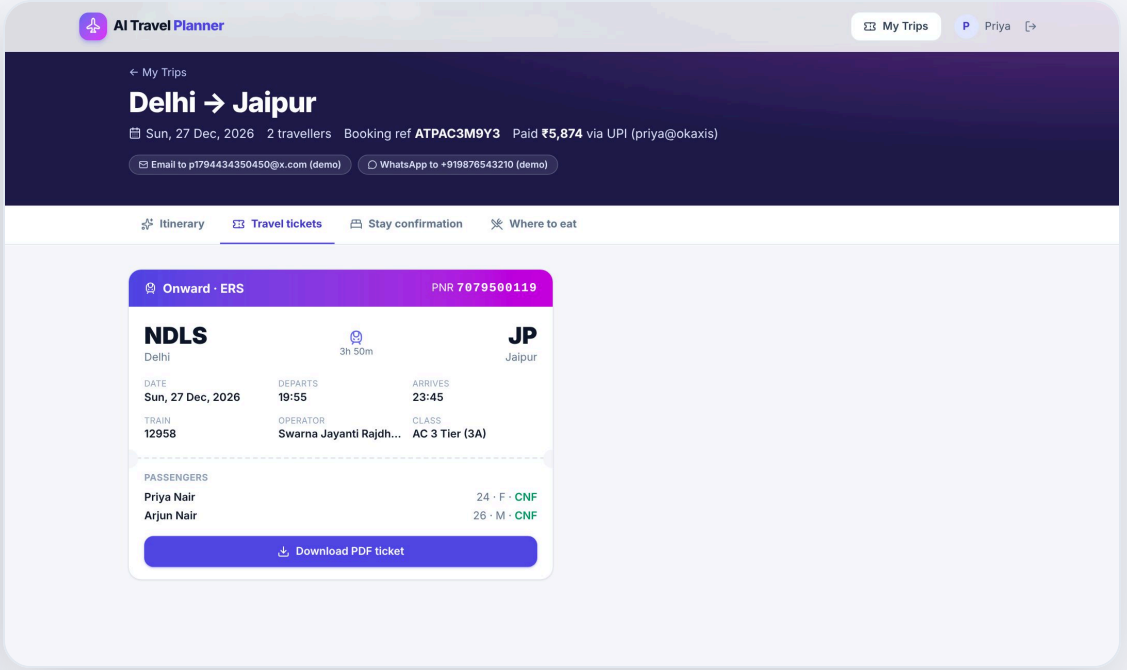

Hotels and hostels priced for the whole group · gallery, map, amenities, nearby attractions and house rules · select with one tap.

THE PRODUCT · WORKING MVP

After payment: tickets and a day-by-day plan

Itinerary with morning / afternoon / evening, food picks and local tips · PDF e-tickets and stay voucher · confirmations sent to email and WhatsApp.

HOW WE USE AI · GOOGLE GEMINI

AI that plans around what you actually booked

Today: personalised itinerary

- Input: arrival & departure times, hotel and area, travellers' ages and meal preferences, special requests, saved restaurants
- Output: structured JSON, one entry per day with morning/afternoon/evening, food, local tip and packing list
- Validated against a schema, with a safe fallback plan if the model fails

Next with the Gemini API

- **Chat to edit the trip**: "make day 2 relaxed", "add a vegetarian dinner near the fort"
- **Smart picks**: rank trains, stays and food by budget, time and group type
- **Multimodal help**: read a ticket photo or screenshot to import an existing booking
- **Multilingual plans** in Hindi, Telugu, Tamil and more

MARKET & BUSINESS MODEL

Built for India's domestic travellers

👥 Who it's for

- Students and young professionals on weekend and holiday trips
- Families planning vacations and pilgrimages
- Friend groups booking together
- First-time travellers to a city who need a ready plan

Primary: India · **Next:** nearby markets such as Nepal, Sri Lanka, Bhutan and the UAE, and NRIs planning trips home

💰 How we make money

- **Booking commissions** from hotel, flight and bus partners
- **Convenience fee** per booked journey (already modelled in checkout)
- **Premium AI planner**: unlimited re-plans, chat edits, offline plans
- **Affiliate & local experiences**: tours, activities, cabs
- **B2B**: white-label trip planning for colleges and companies

COMPETITION

Others book. We plan, book and guide.

WHERE WE ARE · HONEST STATUS

A working MVP, with clear next steps

✅ Working today

- Sign-up & login
- Full booking flow
- Live IRCTC trains, seats & fares
- AI itinerary
- PDF tickets
- Email & WhatsApp
- My Trips wallet

🧪 Demo data for now

- Flights
- Buses
- Hotels & hostels
- Restaurants
- Payment (demo checkout)
- Ticket issuing

🚀 Next

- Gemini API itinerary + chat
- Real flight & hotel APIs
- IRCTC / B2B partner for ticketing
- Razorpay live
- Cloud Run launch
- Mobile app

Architecture

Next.js (React + TypeScript) on **Cloud Run** · PostgreSQL on **Cloud SQL** · keys in **Secret Manager** · **Gemini API** for planning · Indian Railways data via IRCTC API with caching · PDF tickets · Resend email · Twilio WhatsApp · **Cloud Build** CI from GitHub
